

Eduardo Cysne

Data Analyst | BI Consultant

Tel.: (+351) 930 550 789 | **Email:** edcysne@gmail.com | **Github:** <https://github.com/Edcysne>

Summary

Data Analyst | BI Consultant with more than 2 years of experience delivering data driven solutions in industrial and consulting environments. Specialized in SQL, Power BI, and ETL pipeline development, with strong expertise in data modeling and dashboard development. Proven ability to automate processes, reduce manual workload, and support decision-making across different environments. Adaptable to new technologies and work methodologies, with fundamentals of Agile, AI and Cloud Computing.

Professional Experience

BENTELER

Palmela, Portugal · Hybrid

Data Analyst | BI Consultant

May. 2025 - Present

- Designed, developed, and managed more than 8 Power BI dashboards to support operational and strategic decision-making across multiple business areas.
- Defined and monitored KPIs for Production, Engineering, and Human Resources, translating business needs into analytical solutions.
- Built and optimized data models using Power BI, DAX, Power Query and SQL, ensuring efficient performance, scalability, and accurate reporting.
- Created and managed a Microsoft SQL Server data warehouse, performing advanced SQL queries for data extraction, transformation, and analytical reporting.
- Developed and automated ETL pipelines using Python, SQL and VBA, improving data reliability and reducing manual reporting effort by up to 70%.
- Architected ETL process from ERP SAP HANA/BW.
- Collaborated with international teams (Germany, Czech Republic, Poland) on business intelligence insights, and best practices.

People Analytics Internship

Feb. 2025 - Apr. 2025

- Supported the development of People Analytics dashboards in Power BI, providing insights into workforce metrics such as Headcount, FTEs, planned and unplanned absences and turnover of more than 400 workers.
- Used storytelling with data to present insights to HR stakeholders, supporting initiatives related to employee retention and workforce planning.
- Contributed to process automation initiatives using VBA, Power Platform and advanced Excel functions.

IPStartUp

Setúbal, Portugal · Hybrid

Business Intelligence Consultant | University Student

Oct. 2023 - Feb. 2025

- Participant of university projects for industrial companies in the Sado region, using technologies such as SSIS, SQL querying, VBA, Python and Power BI.
- Played a key role in architecting Power Platform solutions using Power Apps, Power Pages, Sharepoint and Power Automate for data extraction, efficiency improvement, and automation.
- Implemented a Data Warehousing system using SQL queries in a PostgreSQL database.
- Collaborated in a Power BI dashboard for the financial department.
- Helped small local business with financial planning using and teaching advanced Excel features and VBA automations.

Github

Data Engineering with Data Analysis in Azure SQL

Mar. 2025 - Present

- Built an end-to-end data warehousing solution for an automotive manufacturer, replacing an error-prone manual Excel workflow across 4 shifts and more than 20 production lines.
- Developed an automated Excel document using VBA, with data validation rules and user-access restrictions to standardize production data input and reduce human error.
- Designed an EL (Extract-Load) pipeline in Python to extract structured data from Excel files and load it into an Azure SQL Database.
- Implemented a medallion data warehouse architecture (Bronze, Silver, Gold) in Azure SQL using SQL (DDL, DQL, DML), performing data cleaning, data transformation and data normalization.
- Designed and developed an interactive Power BI dashboard for OEE, downtime, and performance analysis.

Data Science for Fraud Detection in Retail Market

Oct. 2025 - Jan. 2026

- Designed and developed an interactive Power BI dashboard for data visualization.
- Executed data exploration using Python (NumPy, Pandas, Matplotlib, and Seaborn) for data extraction, cleaning, transformation, and data analysis.
- Created and queried structured data using SQL (DQL, DML, DCL) in MySQL database.
- Structured the project using Agile methodologies in Jira, managing tasks, iterations, and key business insights.
- Utilized Git for version control and Visual Studio Code (VS Code) for development.

Education

Polytechnic of Setúbal

Bachelor's Degree, Information Systems

Setúbal, Portugal

Sep. 2025 - Present

Datatech Florida

Bootcamp in Data Science & AI

Florida, United States of America · E-Learning

Feb. 2025 – Dec. 2025

Polytechnic of Setúbal

Associate Degree in Management Consultancy

Setúbal, Portugal

Oct. 2023 - Jun. 2025

Certifications

Green Belt Six Sigma, CLT Services

Jun. 2026 - Present

Power BI Data Analyst Associate | PL-300, Microsoft

May. 2026

Azure Data Fundamentals | DP-900, Microsoft

Apr. 2026

Azure Fundamentals | AZ-900, Microsoft

Mar. 2026

Excel Expert | MOS-211, Microsoft

Feb. 2026
